

BOOK

See next page for what two readers have said about the book

“This is impressive! William Kisaalita draws from the rich African story telling traditions and makes complicated concepts accessible, no matter what the reader’s background is. Readers will feel like they are in his field class, with all the sights and sounds. Reading the book and putting the lessons in practice will drastically reduce the time to the reader’s development-related destination.”

Dr. Salibo Somé

Founder and Executive Director, Africa Sustainable Development Council, Ouagadougou,
Burkina Faso

“A long overdue book and an excellent guide and light of best practices for developing technologies for smallholder farmers. The author’s scholarly observations from over two decades of successful innovations in sub-Saharan Africa is a premier of Development Engineering.”

Professor Gajendra Singh

Foreign Fellow, National Academy of Agricultural Sciences (India);
Vice-President of Academic Affairs Emeritus (Thailand);
Full Member of the Club of Bologna
